		☐		☐ Yes	☐ No		☐ Yes	☐ No	
		☐		☐ Yes	☐ No		☐ Yes	☐ No	
		☐		☐ Yes	☐ No		☐ Yes	☐ No	
Total farm (inc ungrazeable)									

Note: A block is an area of the farm with the same site and management characteristics.

Different blocks should be defined where there are differences in:

Effluent and Non Effluent

Management (irrigation, fertiliser, effluent, stock class, etc...)

Planting (bush, forestry, riparian)

Pasture or Crop

Support Blocks

Topography (flat, rolling, easy hill, steep hill, etc)

Spring calving herd - Monthly cow numbers on the effective milking area

Note: This refers to the dairy herd only i.e. cows forming part of the milking herd (when lactating and dry) with the exclusion of replacements, carry overs and non-dairy livestock. Enter values into this table in conjunction with Table 13a and Table 15 in the Level 2 questionnaire.

Once a day milking (circle one):	Never	All season	During calving	During drying off	**Final dry off date:**	
	Half of the season	During calving and drying off				

	July	August	September	October	November	December	January	February	March	April	May	June
Number of cows grazed on the platform												
% herd fed in shed during lactation												
Number of cows grazed off the platform												
Date cows are leaving/ coming to the platform												

DairyNZ

Autumn calving herds - Monthly cow numbers on the effective milking area

Once a day milking (circle one):	Never	All season	During calving		During drying off	Final dry off date:	
	Half of the season		During calving and drying off			# Autumn carryovers to spring herd: (nb. Add these animals to the spring table)	

		2023	Jun	Jul	Aug	Sep	Oct	Nov	Dec	2024	Jan	Feb	Mar	Apr	May	Jun
Number of cows grazed on the platform	Autumn Herd															
	Autumn Calving Heifers				These opening /closing numbers should match 'in-milk' carryovers at 1 June and 31 May in Section 12 of the level 2											
	Spring Carryovers															
	Total															
% herd fed in shed during lactation																
Number of cows grazed off the platform																
Date cows are leaving/ coming to the platform																

Other stock grazed on the effective milking area

Refers to all other stock types including calves, R1, R2, bulls, carryovers, non-dairy livestock, etc... Indicate the destination of other stock i.e. sold, culled, remain on farm.

Off-pasture structures on milking area (if applicable)

Structure type 1	Wintering Pad/Shelter ☐　　Standoff Pad ☐　　Feed Pad ☐	Is the structure covered?	Yes ☐　　No ☐
Pad surface:	☐ Carbon rich (sawdust, bark, woodchip)　☐ Soil ☐ Inert (lime, rock mix)　☐ Concrete	☐ Is the Pad lined, subsurface drained and effluent captured? ☐ is the Surface scraped regularly	

	July	August	September	October	November	December	January	February	March	April	May	June
No. days structure used												
% or No. animals using structure												
No. hours/day each animal is on structure												
Type of animal on structure (MAC, R1, etc)												

Note: When recording the No. of hours on structure this needs to be averaged out if it is frequented by more than one herd e.g. if a 400 cow herd used the structure for 4 hours and another 300 cow herd used the structure for 4 hours, it should be recorded as 700 cows using the structure for 4 hours/day.

Effluent Management;	☐ Flushed with water and treated same as dairy effluent ☐ Flushed with water - solids are separated. Liquids treated same as dairy effluent - add solids management below ☐ Scraped (no water) - add effluent management details below ☐ Scraped (no water) - solids are separated. Liquids treated same as dairy effluent - add solids management below ☐ Scraped - all materials added to farm system and treated same as dairy effluent	
Separated Solids Management:	☐ Spread on blocks　　or ☐ Exported If Spread on Blocks Storage method: ☐ Covered ☐ Open to rain ☐ No Storage Time in Storage: _____ months Which blocks are the separated solids on: What months are the separated solids spread:	**For Wintering Pads;** Enter number of months between adding animals and cleaning the bunker; _____ months ☐ Liquid drains away (added to liquid effluent) ☐ Concrete feed apron present and used

| Structure type 1 | Wintering Pad/Shelter ☐ | Standoff Pad ☐ | Feed Pad ☐ | Is the structure covered? | Yes ☐ | No ☐ |

| Pad surface: | ☐ Carbon rich (sawdust, bark, woodchip)   ☐ Soil
☐ Inert (lime, rock mix)   ☐ Concrete | ☐ Is the Pad lined, subsurface drained and effluent captured?
☐ is the Surface scraped regularly |

	July	August	September	October	November	December	January	February	March	April	May	June
No. days structure used												
% or No. animals using structure												
No. hours/day each animal is on structure												
Type of animal on structure (MAC, R1, etc)

| Effluent Management; | ☐ Flushed with water and treated same as dairy effluent

☐ Flushed with water - solids are separated. Liquids treated same as dairy effluent - add solids management below

☐ Scraped (no water) - add effluent management details below

☐ Scraped (no water) - solids are separated. Liquids treated same as dairy effluent - add solids management below

☐ Scraped - all materials added to farm system and treated same as dairy effluent | |
| Separated Solids Management: | ☐ Spread on blocks   or ☐ Exported

If Spread on Blocks
Storage method: ☐ Covered ☐ Open to rain ☐ No Storage

Time in Storage: _____ months

Which blocks are the separated solids on:

What months are the separated solids spread: | **For Wintering Pads;**
Enter number of months between adding animals and cleaning the bunker;
_____ months

☐ Liquid drains away (added to liquid effluent)

☐ Concrete feed apron present and used |

Farm dairy effluent application

Effluent management system?	☐ Spray from sump ☐ Holding Pond
	☐ 2 Pond + Discharge ☐ Holding Pond (solids are separated)
	☐ Exported
Liquid effluent management?	☐ Spray regularly ☐ Stir and Spray Regularly
	☐ Spray infrequently ☐ Exported

Block name(s)	Months liquid effluent is applied to land (tick)											
	July	August	September	October	November	December	January	February	March	April	May	June

| Effluent application rate (depth) - if measured by bucket test (mm): | ☐ <12mm ☐ 12-24mm ☐ >24mm ☐ Low application rate |

Solids Management - if solids are separated?	☐ Spread on Blocks ☐ Exported	Time in storage?	months
Storage method (of separated solids)?	☐ Covered ☐ Open ☐ No Storage		
What months are separated solids spread in?			
Where is solid effluent disposed of? e.g. off-farm, effluent block, non-effluent block			

How often are pond solids removed?	years
Were pond solids removed and spread in the 2023/24 season?	☐ Yes ☐ No
If yes, What month(s) were pond solids spread/disposed of?	
If yes, What block(s) were solids spread on?	

Irrigation activity – not including effluent spread on pasture

Please indicate these areas on the farm map and include a soil moisture graph for the season

Irrigation methods: Linear & Centre Pivot, Controlled Flood, Solid Set, Micro-irrigation (drip and sprinkler), Spraylines, Travelling Irrigation, Border Dyke

How is irrigation schedule?	☐ **Fixed Depth and Return Period;** Depth per application _____ mm/app Return period _____ days	<u>or</u> ☐ **Application Depth;** Application depth _____ mm		<u>or</u> ☐ **Visual Assessment/dig a hole** Depth per application _____ mm/app Return period _____ days	
Or if using **Soil Water Budget** or **Soil Moisture Sensors (probes/tapes)** complete Strategy below:					
Strategy ☐ Soil Water Budget or ☐ Soil Moisture Sensors	☐ **Trigger point;** Units used; ☐ % PAW <u>or</u> Depth per application: _____ mm/app, Minimum return period: _____ days ☐ mm deficit Trigger Point ____ % ☐ **Depth applied to achieve target; fixed return period;** Units used; ☐ % PAW <u>or</u> Minimum depth: ____ mm/month Maximum depth: ____ mm/app Return Period: ___ days ☐ mm deficit Target ____ % ☐ **Trigger point and depth applied to achieve target:** Units used; ☐% PAW <u>or</u> ☐ mm deficit Trigger Point____ % Target: _____ %				
Months Irrigation Applied	☐ Jul ☐ Aug ☐ Sep ☐ Oct ☐ Nov ☐ Dec ☐ Jan ☐ Feb ☐ Mar ☐ Apr ☐ May ☐ Jun				

Fertiliser application (pastoral only)

Enter the type of fertiliser and the application in either tonnes, kg, or kg / ha.

Block name				Soil test date			pH		Olsen P	

	July	August	September	October	November	December	January	February	March	April	May	June
Fertiliser type e.g. urea, DAP												
Tonnes												
Kg												
Kg / ha												

Select one

REQUIRED: Provide a farm map indicating effluent area, irrigation types and contour

If a farm map is not available, provide a screen shot (Google Maps) of the farm boundaries and indicate effluent area and irrigation. Check that main roads, rapid number locations and/or North/South orientation are clearly indicated on farm maps

REQUIRED: Provide a map of the support land

If a map is not available, provide a screen shot (Google Maps) of the support land

Any Additional Notes or Feedback
